## Accreditation to Technical Criteria

### In-Service Inspection and Testing of Electrical Equipment

---

Classification in this category is intended for those enterprises undertaking in-service inspection and testing of electrical equipment.

Classification in this category may be achieved if the enterprise:

- Has publications and documentation appropriate to the range and scale of work undertaken which must include the IEE Code of Practice for In-Service Inspection and Testing of Electrical Equipment (as amended).
- Will undertake that all work is carried out by competent persons to a standard not less than that laid down in the IEE Code of Practice and shall conform with the requirements of BS7671 and the Electricity at Work Regulations 1989.
- Has at least one nominated competent person who is either a principal or full-time employee of the company, has the necessary skills and experience to carry out the work and has successfully completed recent assessed training on in-service inspection and testing of electrical equipment (see note below).

**Note:**

Appropriate assessed training carried out within the last five years would be considered to meet the requirement for recent training. This however is at the discretion of the Central Board depending on the level of knowledge and experience of the nominated competent person, and the scope of work undertaken.
