

Training to Progress

Why train with SELECT

As Scotland's Trade Association for the Electrical Industry we are ideally placed to offer training courses that meets the industry's needs.

- Approved by the Scottish Qualifications Authority (SQA)

- Courses designed and delivered by SELECT's Technical team who combine a high level of technical knowledge with a great deal of practical experience

- Courses run throughout Scotland

- Courses can be delivered in-house to groups of 8 or more

- Courses accepted by the SJIB for Grade Card Renewal

SELECT Member companies receive a large discount against standard course cost.

Recognition

We are an SQA approved Training Centre. All of our BS 7671 training programmes are jointly certificated by the SQA. Two of our SQA Customised Awards have been assessed by experts at the SQA and placed on the [Scottish Credit and Qualifications Framework \(SCQF\)](#).

SCQF Level 7

- SQA [SELECT] Tailored Award in Design & Verification of Electrical Installations to BS 7671 (208)
- SQA [SELECT] Customised Award in Inspection & Testing (including Periodic) to BS 7671 (214)

These programmes have been placed on the SCQF Framework at Level 7. This is comparable to QCF level 4 qualifications on the QCF Framework that operates in England & Northern Ireland.

SQA Customised Award Scheme

SELECT's BS 7671 training programmes are approved under the Scottish Qualifications Authority (SQA) Customised Award Scheme. This accreditation means that all delegates who undertake our BS 7671 training programmes and pass the associated assessments, will receive a certificate from the SQA. These certificates are jointly badged by SELECT and the SQA.

SQA [SELECT] Tailored Award in Design and Verification of Electrical Installations (208)

This programme is for those practicing electricians who want an in-depth knowledge of the wiring regulations and initial verification. The course also covers the design of electrical installations including cable sizing.

The course is delivered over three training days and includes home study and project work.

SCQF Level 7

SQA [SELECT] Customised Award in Initial Verification of Electrical Installations (209)

This programme has been designed for practicing electricians wanting to keep their skills and knowledge up-to-date in relation to inspection, testing and certification of new installations, additions and alterations.

This course uses a combination of delivery methods. Completion of a short online course and attendance at a one day training course.

SQA [SELECT] Customised Award in Inspection & Testing of Electrical Installations including Periodic Inspection (214)

This programme has been designed for practicing electricians who want to cover the full scope of inspection and testing. This programme is recommended for those involved in the inspection and testing of both new and existing installations.

This course is delivered over two training days. Delegates must attend an Initial Verification one day course plus a Periodic Inspection one day course.

SCQF Level 7

SQA [SELECT] Customised Award in Requirements for Electrical Installations to BS 7671 (218)

This programme has been designed for practicing electricians and others responsible for ensuring that electrical installations are installed and commissioned in accordance with current requirements.

This course uses a combination of delivery methods. Completion of a short online course and attendance at a one day training course.

We know how difficult it can be to take time away from work to attend courses so we have designed these programmes to be flexible.

There are a range of programmes on offer. Each programme uses a combination of online learning, self-study and training workshops. We have options that involve

attendance at only one training day or alternatively you can complete the course over two or three training days. Full programme information is available on our website.

Meet Our Trainers

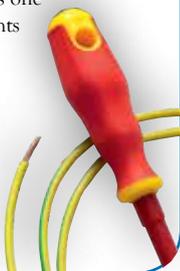

We believe our trainers are amongst the best in the field. They attend panels and committees where most of the standards are set. In addition, our trainers have practical experience and have previously worked as electricians in the public and private sector. The combination of skills and experience means that our courses are relevant to your business needs.

Management Training

SELECT/Napier Graduate Certificate in Management Practice
This course is aimed at managers in the electrical industry who want to develop their leadership and communication skills in order to enhance their company's performance. This programme is part-funded by EETF.

Site Supervisory Course
This two-day course is a stand-alone practical course that introduces the

key non-technical skills required of Site Supervisors. The main focus of the course is the development of people skills for Supervisors. This course meets one of the requirements set out by the SJIB for those electricians interested in becoming graded as a Technician Electrician.

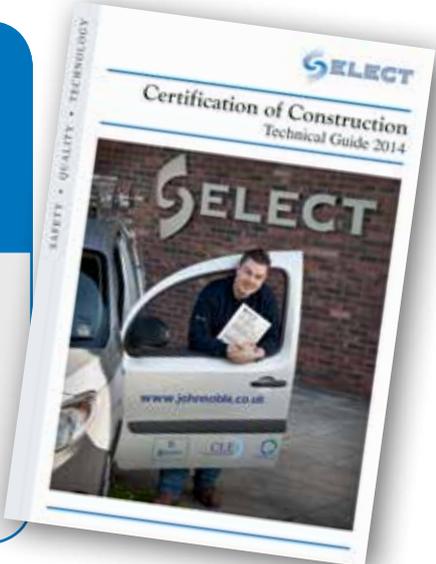

Scottish Building Standards - Online (408)

This online course provides the necessary information for an Approved Certifier of Construction to remain up to date with Scottish Building Standards Guidance and Legislation. The online course is designed to be flexible and can be studied at any time and place to suit the candidate.

Scottish Building Standards (216)

This one-day course is part of the requirements for all practicing electricians who intend to register as an Approved Certifier of Construction (Electrical Installations to BS 7671) under the Scottish Building Standards system.

In-service Inspection & Testing (207)

This one-day course is recommended to electrical practitioners involved in inspection and testing of electrical equipment including portable appliances.

ECS Health & Safety (102)

This one-day assessed course is intended for electrotechnical personnel looking to refresh and update their Health & Safety knowledge before undertaking the assessment in line with the Construction Skills Certification Scheme (CSCS) skill card requirements.

Industrial and Commercial Design Training

We identified that there was a specific industry requirement for a course which would enhance the skills of electricians and support their professional development.

We worked closely with our partner, Edinburgh Napier University, to develop a course which would provide participants with a good background in design and allow them, on successful completion, to tackle commercial electrical system design in a more confident manner.

The course will be delivered over 5 teaching days with additional support provided via specially designed learning materials which participants will undertake on a self-study basis.

Further information on content, dates and costs is available from SELECT Training, training@select.org.uk or call SELECT training on 0131 445 5577

Room Hire at SELECT

SELECT's purpose built office and training centre is the ideal venue for organisations who are looking for a space to host a meeting or event. We have ample car-parking, a selection of rooms available for

hire and can cater for groups from 2 to 50.

Contact training@select.org.uk for further information.

Emergency Lighting (221)

This one-day course is recommended to electrical installation practitioners and others responsible for ensuring that emergency lighting systems are designed, installed and commissioned in accordance with current standards.

Safe Isolation (217)

The half-day course is intended to provide practical guidance for electrical operatives on low voltage safe isolation procedures during construction projects.

Intruder Alarm Workshop (202)

This two-day workshop is designed to provide installers with sufficient knowledge to carry out on site surveying, design, installation, testing, commissioning, documentation and after sales service.

Fire Alarm Workshop (203)

This two-day workshop is to provide candidates with the basic knowledge on the design, installation and maintenance of fire detection and fire alarm systems in line with the British Standard BS 5839 Part 1:2013.

CCTV Workshop (204)

This two-day workshop exposes candidates to the very latest in advanced design and installation and equipment technology. With the knowledge gained from this course candidates will be able to take a contract from survey to completion and maintenance.

Training in Partnership

Working with carefully chosen partners, we can offer a range of Health & Safety and business critical Courses.

These include:

- Asbestos Awareness (310)
- Emergency 1st Aid at Work (101)
- IPAF (211)
- Manual Handling (324)
- Managing Health & Safety (327)
- Risk Assessment (328)
- PASMA (211)
- SSSTS (324)

In-house training

Many of our courses can be offered on an in-house basis. In-house training is a cost effective approach for organisations that want to train a larger group of people. This offers the flexibility of choosing your own venue and preferred date.

Contact us for further information.

Further information on our courses, plus information on costs and locations can be found on the SELECT website www.select.org.uk or by contacting the Training Team on 0131 445 5577 or email training@select.org.uk
